Edition A4

In der Edition A4 werden Konzertstücke nicht als Notenhefte in papierener Form, sondern digital als PDF veröffentlicht. Die Publikationsliste finden Sie unter: **www.musica-longa.de**

Ausgaben der Edition A4 sind in der Deutschen Nationalbibliothek (**www.dnb.de**) gespeichert und unter der zugehörigen **ISMN-Nummer** auffindbar. Auch für digitale Ausgaben gilt das Verlagsrecht in vollem Umfang.

Im Unterschied zu Druckausgaben sind Vervielfältigung und Ausdruck der Edition-A4-Ausgaben **in vollständiger und unveränderter Form** erlaubt und erwünscht. Die digitalen Notenausgaben stehen kostenlos zum Download und dürfen nicht verkauft werden. Damit Sie die Umwandlung in Papier bestmöglich selbst betreuen können, musste der Notensatz in das Format DIN A4 eingepasst werden. (Das breitere traditionelle Notenformat bleibt aus technischen Gründen der Druckerei vorbehalten.)

Wenn Sie Kompositionen der Edition A4 im Konzert spielen, senden Sie bitte Ihre Konzertprogramme an: **post@musica-longa.de**

Das ist eine große Unterstützung für Komponisten. Eine andere Möglichkeit besteht in der Überweisung eines Betrages Ihrer Wahl für die Nutzung dieses PDFs über PayPal an die oben stehende Mailadresse.

Edition A4

In Edition A4, concert pieces are not released as books in paper form, rather published digitally as PDFs. The publication list is available at: **www.musica-longa.de**

Edition A4 publications are stored in the German National Library (**www.dnb.de**) and can be found under the corresponding **ISMN number**. Publishing rights apply in full also for digital releases.

In contrast to printed editions, the reproduction and printing of Edition A4 works, **in complete and unaltered form**, are permitted and welcome. The digital sheet music editions are free to download and may not be sold. In order for you to optimally transfer the works to paper yourself, the sheet music had to be modified to fit in DIN A4 format. (The broader traditional notation format remains reserved for the publishers on technical grounds.)

If you perform compositions of the Edition A4 in concerts, please send the applicable concert programmes to: **post@musica-longa.de**

This is a great support to composers. Another possibility is the payment of a contribution of your choice for the usage of this PDF via PayPal to the e-mail address above.

Impulse: mit ① und ② im schnellen Wechsel Töne durch intensives Tippen der Fingerspitzen auf die Saiten über dem Griffbrett erzeugen · **a)** ca. 2.–5. Bund, **b)** ca. 7.–12. Bund · Töne auf Bündeln und Saiten breit verteilen, s. Symbolgrafik

Impulsos: alternar rápidamente entre ① y ② para producir sonidos golpeando intensamente las cuerdas con las yemas de los dedos sobre el diapasón · **a)** aprox. trastes 2–5, **b)** aprox. trastes 7–12 · distribuir las notas por los trastes y las cuerdas, ver gráfico simbólico

Strike with snoring: **a)** strike all strings vigorously with the heel of ② just before the last fret, maintaining pressure: snoring sound with pitches · **b)** additionally strike the rib with the flat hand

Photos of outer space taken through the Hubble telescope are accessible to everyone: <https://esahubble.org>. Many of the most beautiful, in my view, are to be found at „Nebulae“. These can be displayed at the concert. The rights are free.

Stories from the spaceship „Enterprise“, the great spiritual writings, the musical energy which found its perfect expression through the music of Bach, are fascinating. Since the advent of the oud, lute and guitar, the sounds created by these instruments were perceived as conducive to contemplation in both philosophical and religious contexts. (religion here is to be understood in its original meaning, „reconnection“, and not as institutional).

All of this has led to „Spirit in Space“. With the first movement, the six guitars present, through their spe-

cial tones and sound effects, an opening into the vast, infinite space of the universe. In the succeeding movements they interact as two groups of three, merging freely into each other.

The semicircular formation enables motives and sounds to wander throughout the celestial panorama. Tones and sounds reappear within the polyphonic and ultimately symphonic development. The fourth movement leads to a climax through a highly energetic percussive passage involving all six guitars.

The final movement enters into a reverberation with the chorale „Gib dich zufrieden und sei stille“ (Be content and be still), J. S. Bach, BWV 511 which then expands to a final vision of endless infinity. FH

Weltraumfotos des Hubble-Teleskops sind für alle zugänglich: <https://esahubble.org>. Viele der schönsten sind für mich unter „Nebulae“ zu finden. Diese können im Konzert gezeigt werden. Die Rechte sind frei.

Geschichten des Raumschiffes Enterprise, große spirituelle Schriften und die musikalische Energie, welche sich über Bach vollendet ausgeformt hat, sind faszinierend. Seit dem Bestehen von Oud, Laute und Gitarre wurde der Klang dieser Instrumente als öffnend zur Kontemplation wahrgenommen, sowohl im philosophischen als auch im religiösen Kontext. Wobei Religion hier in der Urbedeutung von „Rückverbinden“ gemeint ist (nicht als Institution).

Das alles brachte „Spirit in Space“ hervor. Die sechs Gitarren werden mit ihrer besonderen Qualität als

Klang- und Geräuschwunder eingesetzt, öffnen damit im ersten Satz die endlosen Weiten. Im Weiteren interagieren sie in zwei Chören zu je drei Instrumenten, verschmelzen in der Sechsstimmigkeit.

Mit der Halbkreisordnung können Motive und Klänge im Panorama wandern. Geräusche und Klänge kehren innerhalb der polyphonen und bis zur sinfonischen Bewegung gehenden Entwicklung wieder. Der vierte Satz beinhaltet den Höhepunkt in einer sehr energischen Perkussionsszene aller sechs Gitarren.

Der V. Satz tritt in den Nachhall mit dem Choral „Gib Dich zufrieden und sei stille“, J. S. Bach, BWV 511 ein, der Choral breitet sich anschließend in der Schlussszene in den unendlichen Weiten aus. FH

Las fotos espaciales del telescopio Hubble están disponibles para todos: <https://esahubble.org>. Para mí, muchas de las más bonitas se encuentran en «Nebulae». Estas pueden mostrarse en el concierto. Los derechos son gratuitos.

Las historias de la nave espacial Enterprise, los grandes escritos espirituales y la energía musical, la cual se ha perfeccionado a través de Bach, son fascinantes. Desde la existencia del oud, laúd y la guitarra, el sonido de estos instrumentos se ha percibido como una invitación a la contemplación, tanto en el contexto filosófico como en el religioso. Entendiendo religión por su significado original de „reconectar“ (no como institución).

Todo ello dio lugar a «Spirit in Space». Las seis guitarras se utilizan con su cualidad especial como maravilla

sonora y acústica, abriendo así en el primer movimiento la inmensidad del cosmos. A continuación, interactúan en dos coros de tres instrumentos cada uno, fusionándose en un canto a seis voces.

Con la disposición en semicírculo, los motivos y los sonidos pueden desplazarse de forma panorámica. Los ruidos y sonidos regresan dentro de la polifonía hasta el movimiento sinfónico del desarrollo en curso. El cuarto movimiento contiene el clímax en una escena de percusión muy enérgica de las seis guitarras.

El V. movimiento ingresa haciendo eco del coral «Gib Dich zufrieden und sei stille» (Date por satisfecho y mantén el silencio), J. S. Bach, BWV 511, el cual se expande en la escena final en la inmensidad del espacio. FH
